Hagener Feinstahl

MEMBER OF THE BenderWire Group

WHERE WE PRODUCE

North Rhine-Westphalia
At the heart of Germany's steel region.

Stainless steel wire, made to measure.

The grade
From ferritic to nickel-based alloys.

The dimension
From 0.20 to 14.00 mm.

The quantity
From 1,000 kg per order.

A family-owned German wire-drawing mill since **1932** – we draw the wire you order ourselves. We are part of the **BenderWire Group** and have been redefining wire since 1815.

OUR NUMBERS

DIAMETERS
0.20 – 14.00 mm
Drawn, heat-treated and finished in Hagen – one supplier for the full range.

OUTPUT
≈ 1,500 t / month
Around 100 employees, three shifts, 24/5 – with weekend shifts when needed.

REVENUE
€ 65 M
Small enough for special requests, large enough for high volumes.

LEAD TIMES
Fast
A large stock of wire rod lets us start production straight away. Delivery cycles as short as three weeks for standard grades.

WHAT MAKES US DIFFERENT

01 **Made to order**
Tailored to your enquiry: exactly the grade and dimension your application needs, calibrated for your process.

02 **Independent producer**
We are not tied to any single steel mill. Together with our raw material partners we select the heat that suits your application and guarantee full traceability.

03 **A sensible minimum order quantity**
From 1,000 kg: order what you need without holding stock yourself. For smaller quantities we will find a solution together.

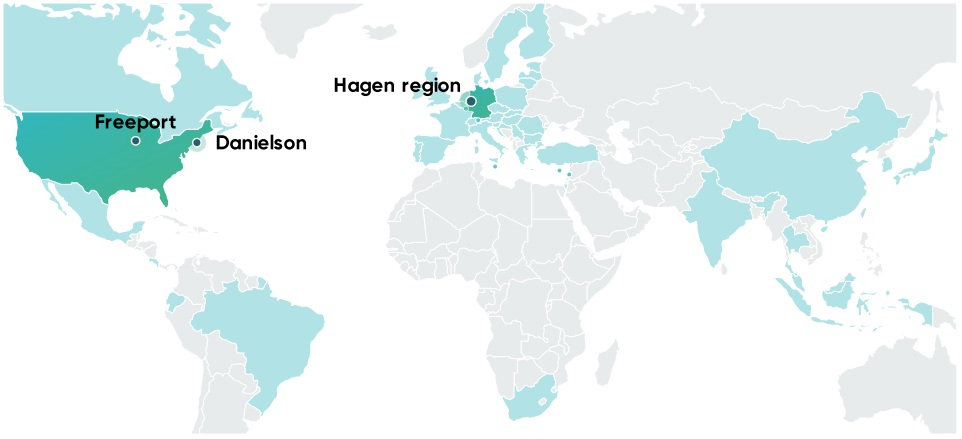

04 **Clarity from day one**
Order confirmation with delivery date and price within 48 to 72 hours. The wire rod is already in stock – all that remains is production scheduling.

Produced in Germany and the US.
Delivered wherever you are.

Our stainless steel wire is drawn at three sites in the Hagen region, North Rhine-Westphalia — **Hagen, Iserlohn and Nachrodt-Wiblingwerde** — and, within the BenderWire Group, at our sister mills in **Freeport (Illinois)** and **Danielson (Connecticut)**. Across Europe we look after our customers directly. One specification, one point of contact, one responsibility.

Production in Germany and the US
Hagen · Iserlohn · Nachrodt-Wiblingwerde · Freeport (IL) · Danielson (CT)

Countries we supply
Across Europe and on four other continents — from Canada to Japan, from Finland to South Africa.

MATERIALS WE DRAW

Ferritic	1.4016 (430)
Austenitic	1.4301 (304) · 1.4303 (305) · 1.4310 (302) · 1.4401 (316) · 1.4404 (316L) · 1.4567 (304Cu) · 1.4539 (904L)
Duplex	1.4362 (2304) · 1.4462 (2205) · 1.4482 (S32001)
Heat-resistant	1.4541 (321) · 1.4828 (309) · 1.4841 (314) · 1.4845 (310S) · 1.4864 (330)
Special · nickel-based	2.4060 (Alloy 200) · 2.4851 (Alloy 601) · 2.4858 (Alloy 825) — others on request

Extract from our delivery programme — EN Werkstoff-Nr. with AISI / UNS equivalent in brackets. Further grades on request.

COLD HEADING WIRE
About two thirds of our output

Drawn and conditioned for cold forming, with surfaces engineered for the heading process.

Bolts & nuts · Screws · Rivets · Welding studs · Blanks

BENDING WIRE
For demanding forming and mesh

Including high-temperature and food-contact applications.

Conveyor belts · Filter cages · Refractory anchors · Mesh

Certified: ISO 9001:2015 — quality, since 1996 · ISO 50001:2018 — energy management | **Group:** five specialised wire mills in Germany and the USA, independent of any single steel mill, with full traceability from raw material to finished wire.

YOUR CONTACTS IN EUROPE
